

Workshop on Analogies: Integrating Multiple Cognitive Abilities (AnICA07)

in Nashville, Tennessee, August 1st 2007

**Held in conjunction with CogSci 2007,
the Annual Meeting of the Cognitive Science Society**

Workshop Theme

Analogical reasoning is a highly sophisticated cognitive process where two domains are compared and analyzed for common patterns. It could be the missing link for the understanding of cognitive abilities in natural complex systems. Researchers who attempt to use analogies for modeling of cognitive abilities are considered as a special target group of the workshop. The workshop addresses the potential of analogies concerning the following topics:

- learning and abstraction,
- memory,
- reasoning,
- context and adaptation,
- human-level intelligence,
- large-scale cognitive systems.

Therefore the workshop is aimed to gather researchers who are working in the field of analogical reasoning and focus on analogy as an integrating basis for human cognition.

Keynote Speakers:

Boicho Kokinov, New Bulgarian University, Bulgaria

Keith Holyoak, University of California, Los Angeles, USA

Ken Forbus, Northwestern University, USA

Call for Papers

Anybody with an interest in the questions raised above is invited to submit a position paper as basis for discussions during the workshop. Extended abstracts of approximately 2000 words should be sent by email to anica07@uni-osnabrueck.de. Accepted papers will be published online in the "Publication Series of the Institute of Cognitive Science" (PICS, ISSN 1610-5389), a scientific series from the Institute of Cognitive Science, University of Osnabrueck, unless the authors instruct us otherwise. Authors will be notified whether their position papers have been selected for an additional short-presentation during the workshop.

Authors are invited to submit a full paper of their workshop submission to a post-workshop review process, leading to a journal special issue on future directions for analogical reasoning research.

Organizers

Angela Schwering, Ulf Krumnack, Kai-Uwe Kühnberger, Helmar Gust
Institute of Cognitive Science, University of Osnabrück

Important Dates

Submission	29 th May 2007	!!! Deadline Extended !!!
Notification	08 th June 2007	
Camera Ready	18 th June 2007
